EXPERIENCE

SOFTWARE DEVELOPER | STEP TO SOFT PVT LTD | Feb 2022 – Present
- Developed and maintained RESTful APIs using JavaScript, Node.js and Express.js to support real-time data processing.
- Coordinated in debugging and resolving client-reported issues, leading to enhanced system stability.
- Spearheaded new features based on client's requirements and specifications.
- Participated in code reviews, testing, and documentation to code quality and project Integrity.
- Identified and resolved technical issues, Assessed system improvements, and optimized website performance.

WEB DEVELOPER INTERN | STEP TO SOFT PVT LTD | Nov 2021 – Feb 2022
- Demonstrated expertise in building full-stack web applications, mastering the fundamentals of JavaScript, React.js, Node.js, Express.js, and MongoDB.
- Gained hands-on experience in designing, implementing RESTful APIs, back-end logic, database integration and deploying using the MERN stack.
- Collaborated with experienced developers to design, implement, test new features and collaborate with teams to enhance the website.

PROJECTS

Tollmart E-Commerce | Client-Site | Full-Time |

Overview: It's an e-commerce project, where three types of login, admin, seller, and customer, Any seller can register and sell their product to this website. and increase their total revenue.
Key Responsibilities:
- Implemented REST API's for different modules like products , orders and also users Auth.
- Conducted unit testing to ensure application reliability and maintainability.
- Engaged in Extensive debugging to improve application efficiency.

Tech used : Node.js, Express, Rest API Design, JSON, JavaScript, MongoDB.

RauchFrei Smoking | Client-Site | Full-Time |

Overview: This Project is built in MEAN stack, It's used to make addicted smokers smoke free. Addicted patients can register from the tablet device and that result is shown to doctors to suggest and prescribe them how to become smoke free.
 Three types of user in this portal, Super Admin(can access everything), Admin(can be a doctor, employee, clinic) to guide the patient and Employee to manage the devices and patient.
Key Responsibilities:
- Streamlined REST API in NodeJs ,Express using mongodb database.
- Executed detailed code reviews to address bugs.
- Performed unit tests to guarantee application stability.

Tech used : Node.js, MongoDB, Javascript, Express, Rest API Services, JSON.

EKG Healthcare | Client-Site | Full-Time |

Overview: Developed an overall Application, Where Heart rate taken from the Apple watch and stored in apple cloud in AWS S3. Then fetch the data from the clouds and display the graph to the doctor and the next process will be managed like CRM.
Key Responsibilities:
- Created REST API in NodeJs, ExpressJs, JavaScript and MongoDB,
- Spearheaded file storage solutions using AWS S3 to store files on cloud.
- Set up CI/CD pipelines using Jenkins to automate the deployment.

SKILLS

PROGRAMMING LANGUAGES:
- JavaScript • TypeScript • HTML5 • CSS3

Tools & Platforms:
- Git • GitHub • VS Code • Vercel • Netlify • AWS • Postman

Frameworks & Libraries:
- Node.js • Next.js • ExpressJs • MongoDB • Reactjs • Redis • MySQL • Docker • Jenkins • REST API • Jest • Microservice.

EDUCATION

Asansol Engineering College | Bachelor of Technology **|** Grad: Aug 2022 | DGPA: 8.40
